Revolutionize Your Network Strategy
with Broadband Engineered for K12

UDT Internet Access

Today's school districts require resilient, secure, and flexible Internet access to support their growing digital ecosystems.

Network outages and latency issues can disrupt daily operations and bring learning to a stand-still

The increasing data demands of connected devices and applications need scalable, flexible bandwidth

Lack of responsiveness from service providers can generate frustration and impede progress

Experience uninterrupted learning with the reliability of UDT Internet Access.

- Deploy a resilient, end-to-end managed connectivity solution engineered for your environment

- Minimize network disruptions with proactive monitoring and enhanced security tools

- Scale bandwidth on demand to support your school district's evolving connectivity requirements

- Feel confident with 24/7 access to a live customer support team managing your network

Empower your digital environments with seamless connectivity. UDT Internet Access delivers the bandwidth your school district requires without the burden of deploying and managing your own Internet connection.

All-Inclusive Broadband

Get the support you desire when it comes to your broadband. Gain a tailored network design, managed provisioning, implementation, and installation, complete maintenance of your circuits and networking equipment, technical support, and more.

Flexible, Resilient Design

Build the secure, enterprise-grade broadband solution that is best for your school district. Our vendor-neutral approach allows us to leverage multiple technologies, carriers, and equipment to customize around your requirements.

Enhanced Security

Built-in security features protect against the cyber threats facing K12, like Distributed DDoS attacks. Security tools proactively alert our engineers so we can effectively neutralize an attack before it impacts your network.

24/7 Support

Gain reliable performance with comprehensive support, complete customization, and enhanced adaptability. Our industry experts have you covered, freeing up your internal teams to focus on other important priorities.

Actionable Insights

Know what's happening in your environment. You can stay abreast of your network via the UDTHub, your single pane of glass for real-time insights, performance metrics, bandwidth utilization reports, analysis tools, and more.

Responsive Partner

Gain access to experts with a proven reputation in supporting the technology needs of K12 Education. Eliminate the stress of juggling multiple vendors and consolidate Internet access across your organization into a single partnership.

Tap into Unparalleled K12 Expertise and Support with UDT

Create sustainable, secure, and connected digital K12 ecosystems with our feature-rich Internet Access.

Dedicated Field Team
Strengthen your staff with a robust team of regionally assigned project managers, engineers, and solution architects.

E-Rate Expertise
As a top ten provider, UDT has the experience to help your school district optimize the impact funding streams

Invested K12 Partner
